

TECH NOTES #5 GETTING MORE FROM A PTZ CAMERA

***Providing a method of mounting the Camera on a Tripod
With the Introduction of our PTZ Camera Tripod Mount users are now able to use their PTZ Camera on
both the Wall or on a Tripod at any time.***

Nigel B Design's Universal Tripod Platform with its Quick Release Plate overcomes the Comparability Mounting Problems that exist between PTZ Camera and a Tripod

An examination of a PTZ Camera and a Tripod show that they do not go together due to the different methods used for Mounting. Nigel B Design has found a way round the problem by making a Camera Platform with "Built In Multi-Use" Camera Plates that allow attachment to any Tripod without modification.

Each Tripod Manufacturer uses their own Mounting Plate. Nigel B Design has produced a Plate that fits all popular Tripods without requiring any modification

Now using out Tripod Plate the same camera can be used with many different tripods without changing a thing

WHEN USING A PTZ CAMERA ON OUR PLATFORM ATTACHED TO A TRIPOD STABILITY IS ASSURED

For a PTZ Camera to be stable when mounted on a Tripod, the Platform needs to be large enough to support the size and weight of the PTZ Camera. Because PTZ Camera require at least 10" x 6.5" the size of our Platform at 12" x 7.5" makes it the perfect Solution.
